its a good game! from turrets to TANKS! i just want to say ITS GREAT!. This is a fun tank game. It feels a lot like "tron" if you liked that movie. Pretty simple if you want a nice casual game.. I really love this little indie game! As the description says you drive a tank in a TRON-like computer system. The missions you have to fullfill have a very wide spectrum, so you will not get bored with always the same routine like in other games. You can also upgrade your tank with very cool new weapons. I recommend everyone to try at least the demo! Btw there is a Tank Universal 2 in developement, but because the Team behind this game is only one person it will take a while until you see a sequel. More sales might shorten the time for release..

Trash.really.. I bought this game on a steam sale for around \$1-2 and it was worth every cent. Considering I loved Tron when I was younger, and still do, I guess I was always going to like this game. It may not be the most graphically advanced game, but the gameplay is fantastic. Every level brought something new, it didn't feel repetitive at all, and on normal difficulty it offered a good challenge, so going straight to hard difficulty is not required. If I had to list a con in the game it would probably be the cut scenes, as they were a little dragged out. Basically, I would say that if you can get this game on a discount buy it. If it's not on discount and you just want a good solid gameplay experience, absolutely buy it. Full price is cheap and its worth it.. I really love this little indie game! More sales might shorten the time for release.. You sucks at 3D graphics and high resolution textures, make it old school Virtual Reality! Yes, the graphics are simplist and texture is all about blue and red wallpapers with neon edges of the same color scheme. Right when you start, you clearly see they sucks at 3D, but what they don't fail at is ballistics and that's all this game is about. The start is a bit confusing, the story somewhat Tron-esque, you're not sure where you're supposed to go with a mission like "Explore". Then you get a tank, asked to follow other tankers, then receive rebel communications of your imminent doom, but hey! we'll help you escape it. Yay! Saved and now you have to do missions for the rebels. Drive tank, shoot other tanks. but wait. better not do so at melee range because you'll get harmed by your bullet explosion. Told you this game was about ballistics. You don't have to hit right, but at least land it as near as possible.
